

To whom it may concern

Aalborg, 2009-02-05

STATEMENT

The SAILOR SP3560 ATEX UHF is provided with voice scrambling facility. Only for channels allowed for use of this facility, the user can select the scrambling mode.

To indicate for the user when using this scrambling facility the display shows "scrm"

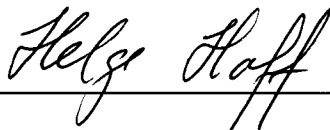

Scrambling mode is disabled when radio is turned off or a new channel is selected.

In the User manual the following is stated:

NOTE: Prior to any initiation of scrambling, the operator must always identify the calling station in clear voice (unscrambled) on that channel. Use of scrambling may also be restricted by national laws.
