

SUBJECT: Variation in module power levels

FCC ID: ROSTEMPUS-1

2 March 2010

To Whom It May Concern:

It should be noted that the measured RF power level detailed in RFI test reports do not match the measured power level detailed on the original test reports/FCC grants for the GSM, Wireless LAN and Bluetooth modules.

Original testing was performed with the modules being testing on a standalone basis and not situated inside a host unit. The measured RF power levels detailed in RFI's test reports were obtained with the respective modules integrated within the TempusIC.

The shielding of the enclosure of the TempusIC product therefore accounts for the reduced power levels detailed in RFI reports.

Respectfully

Chris Hannan

Regulatory Affairs and Operations Manager
