10.03.2006**Statement to the ICM TxR FCC ID: RPN-10063188:**

The ICM TxR is a portable device and used the complete electronic components from the ICM Tx (FCC ID:P9R-10060782 ) with the additional attached limit modular approved LRR Module (ex potted) FCC ID: RPN-10069330.

Therefore all documents related to this both Grants will be used for this new Grant and as well an additional SAR evaluation.

The ICM TxR is a body worn device for fire fighters and other breathing apparatus users with follow functions:

- accelerator indication
- supervisor of the air in the tank
- transmit the status to the head up display
- transmit the status to the ICM TxR Base Station

Kind regards
