RE: Action Technology (Shenzhen) Co., Ltd.

FCC ID: RR87106B

I have a few comments on this application. Depending on your responses, kindly understand there may be additional comments.

1. User manual:

Please indicate where I may find the section 15.21 and 15.105 Information to User statement in the Manual.

2. Schematics:

Please indicate where I can see the "FM Modulation radio BH1417F" module and "SAMSUNG 3F880AXZZ CPU" in the schematics, which were shown on the block diagram but could not be found in the schematics.

Please also indicate where the antenna is located in the schematics.

3. It is required to put the frequency oscillator value on your block diagram according to 2.1031(5).

**"Section 2.1031 (5) A block diagram showing the frequency of all oscillators in the device.**

**The signal path and frequency shall be indicated at each block. The tuning range(s) and intermediate frequency(ies) shall be indicated at each block."**

4. Test report:

Please describe the operating frequency range, the lowest channel, middle channel, highest channel carrier frequency and number of total channels of this device in your test report.

It seems the lowest channel and highest channel carrier frequency tested are 88.1MHz and 88.9MHz in the test report.

George Chen

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
