Dear Tim:

I did check our raw data of the page 35, and I am pretty sure the vertical and horizontal data are all same.

And I upload the revised report.  
 The difference of the revised report is at page 69.  
 We only want to describe the way how the antenna install.

And this mini PCI card may put in a access point with another mini PCI card which is 5GHz and will upload today.  
 So we add the note of calculation for co-located.

Thank you for your kind assistance.

Best Regards,
