

A photograph of a grey metal electronic unit, likely a filter or amplifier, with a label and a red arrow pointing to a specific component. The unit has a top surface with several screws and a black connector. A label on the front of the unit provides identification information. A red arrow points from a text box to a small component on the top surface of the unit.

This part of the EUT (BPF) is already out in the field and would never be manufactured in the future.
