

XM Satellite Radio Inc Additional Information
Provided in Response to ATCB Questions 1-9 dated June 10, 2008
FCC ID RS2XMPCAR1
June 12, 2008

- 1) The new short term confidentiality form that TCB's fill out now ask for a specific release date for short term confidentiality. Please provide appropriate information for this.
Oct 5, 2008.
- 2) For internal photos, is it possible to show the component side without the connector that covers 1/2 the circuitry? If so, please provide.
We can't supply the requested photo, but we are assuring you that there are no components under the connector i.e. under the connector there are no components in that 1/2 of the circuitry its covering.
- 3) Please provide test reports. No test report has been received.
All test reports have now been uploaded.
- 4) Please provide test photo exhibit. This has not been provided.
The test photo exhibit file has now been uploaded.
- 5) Labeling ID's do not match information presented in this application. Please review.
The new labeling ID's that match the information in this application has now been uploaded.
- 6) It appears that the RS2 grantee code is still locked pending pre-grant sample audit completion by the FCC. Please see earlier email and keep us updated on this fact.
Ok.
- 7) FYI....Some exhibits are provided as a scanned image of about 2.5 Meg per page (i.e. 13 page PBA explanation, Application forms, confidentiality letters, etc.). In the future, kindly use a reduced resolution or higher compression to make these files smaller and easier to handle. Ideally each exhibit (i.e. application form, confidentiality letter, etc.) should be a single file of less than 3 Meg.
Understood; we've uploaded the smaller versions of all the files in question i.e. PBA explanation, application forms, confidentiality letters, etc.
- 8) FYI....Regarding short term confidentiality, you are responsible for the following:
 - a) Note that any documents held under the short-term confidentiality will automatically become public after the date specified (up to 180 days maximum).
Ok.

- b) If the manufacturer engages in public marketing activities or otherwise publicizes the device prior to the expiration of the short-term confidentiality period, the applicant must immediately notify ATCB so the exhibits can be made publicly available.

Ok.

- 9) Labeling ID would appear to be incorrect given information on ATCB's site.
The new IC labeling ID has been corrected and uploaded.
