RE: Thomson Telecom Belgium

FCC ID: RSE-ST120G

After a review of the submitted information, I have a few comments on the above referenced Application.

Administrative Issues:

- 1) The application appears to be for a "Change in ID" per 2.933, but includes a letter for a Class II Permissive change. Note that you may not perform both a Permissive Change and Change in ID in one application. Please clarify. Note that it appears that the device may not have any changes, but this can not adequately be determined. Note that for a Change in ID, a cover letter addressing 2.933(b)(4) does need to be provided.

The remaining questions below assume a Change of ID application is being submitted.

- 2) The authorization letter should include the date of grant as specified in 2.933(b).
- 3) External photographs of the new model for Thomson Telecom Belgium should be provided as specified in 2.933(b)(5).

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
