Equipment authorization is valid only for representations and test data EXPLICIT in a filing. Therefore user manual and test report have to agree and explicitly spell out limits applicable (mobile and/or fixed) and how it complies for each.

1) Part 20 test report does not address compliance with applicable mobile gain and noise limits.

CT – The EUT is only for fixed locations, therefore mobile limits do not apply. Please see user manual.

2) Antenna kitting needs to explicitly spell out allowed options for EACH of fixed and mobile application.

Cellphone-Mate – Please refer to updated Antenna Kitting exhibit.
