**FIRST TIME USE ONLY**  
**Setting the handset and receiver code.**  
**The receiver has to learn the handset code:**  
 Press and hold the receiver's reset button until you hear two (2) beeps. After the second, longer beep, release the reset button. Within the subsequent 20 seconds press the (small flame/down) button on the handset. Two (2) short beeps confirm the code is set. If you hear one long beep, this indicates the code learning sequence has failed or the wiring is incorrect.  
**NOTE:** This is a one time setting only, and it is not required after changing the batteries in the handset or receiver.  
 This receiver is equipped with a connection for a seconds thermocouple.  
 This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
