

04 May 2005

Dear Sir/Madam

Colubris Networks has initiated a change in our model CN-200. The CN-200 has been repackaged using a smaller enclosure and assigned new model numbers (MAP-200 and WCB-200). The internal printed circuit board which includes all radio components remains unchanged. In addition, the same antennas, antenna wiring and connectors are used. Only the outer case has been changed. The MAP-200 and WCB-200 differ only in software features and model number. Radiated emissions, safety and immunity testing have been completed on this new enclosure.

Should you have any questions or concerns, please feel free to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Gerrett L. Durling". The signature is fluid and cursive, with a long horizontal stroke at the end.

Gerrett L. Durling
