FEDERAL COMMUNICATION COMMISSION
445 12th Street, SW
Washington, DC 20554

RE: Class II Permissive Change for FCC ID: RTP-550-10016-6

To The Commission:

Colubris Networks is requesting a class II permissive change to the wireless radio device operating under FCC ID: RTP-550-10016-6. This class II permissive change is requested because Colubris Networks has reprogrammed the device's firmware thus disabling the channels operating on the UNII bands; this firmware modification is performed at the point of manufacture and is not accessible/ modifiable by the end user. These bands will be deactivated until a modification filing adding DFS capability can be completed through the FCC.

Should you have any questions or concerns, please feel free to contact me.

A handwritten signature in cursive script that reads "Lou Pereira".
