RE: Dismissal Request: Class II Permissive Change Filing performed 2007-07-20 for FCC ID:

RTP-550-10016-6

To Whom It May Concern:

Bay Area Compliance Laboratories on behalf of their customer Colubris Networks Inc. would like to request to the Dismissal of the Class II Permissive Change filing performed on 2007-07-20. The reason for this dismissal is that there was some confusion concerning the original device and its capabilities (specifically its operating frequencies). Due to a miscommunication, a Class II Permissive Change filing was made in order to declare the deactivation of operation in UNII bands but since the device does not and never has operated in the UNII bands this declaration was unnecessary (operating frequencies are 2412-2462 MHz, 5180-5240 MHz, and 5745-5805 MHz). Therefore, the Class II Permissive Change was not technically applicable to the device. Please dismiss the filing along with the cover letter concerning channel deactivation.

We apologize for any inconvenience this may cause and please contact us should there be any questions concerning this matter.

Best Regards,

A handwritten signature in black ink, appearing to read "Douglas Méndez".
