

Operational Description

This device is a 802.11 b/g/n Wireless USB module, which operates in the 2.4GHz frequency spectrum with throughput of up to 150Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 150Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by host equipment. The antennas used in this EUT are PIFA antenna and PCB antenna with U.FL connector.

The other instruction, please have a look at the users manual.
