RE: Qcom Technology

FCC ID: RUJ-Q802MIAG

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please provide a more detailed block diagram. What we need is one that mirrors in more detail the schematic.
- 2.) The Operational Description describes this mini-PCI product connecting to the computer using a USB interface. Is this correct? If not then kindly correct this oversight.
- 3.) This device appears to utilize simultaneous transmission. The RF Exposure report must show the combined effects of both transmitters operating simultaneously in addition to the information currently posted. Please modify the RF Exposure report.
- 4.) Kindly provide more detailed specifications on the proposed antenna with this system. Is there a manufacturer's specification sheet you could provide?

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
