RE: Freescale

FCC ID: RUNZU

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

- 1) It appears that average measurements are taken and reported. Please note that in pulsed devices, average should only be shown using appropriate duty factor corrections. Given the duty factor correction is > 20 dB in this case, compliance with average limits is shown as long as peak emissions meet peak. Please report appropriately in the future.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
