**Overall Assessment Letter for Ezze MEGA4E**  
**FCC id: RV2MEGA4E**

Dear Sir,

We respectfully request to supersede Exhibit 11 of the PCE part of the above filing. The exact nature of the request is:

Exhibit 11 RF Exposure info file: **06\_4 I08GE6338-FCC-SAR.pdf** to be removed;

And replaced with:

File reference: **Revised I08GE6338-FCC-SAR.pdf**

Both files are currently on the Grant record for the PCE Part of the FCC ID: **RV2MEGA4E**.

The reason is because as part of our assessment of the above product we had checked all the SAR plots and associated data and found them to be compliant. However, a subsequent check identified that the summary table of the worst case results was not entirely complete. We therefore requested a revised report from the test house with the summary table to be fully completed. They supplied this promptly.

The technical information in the report has not changed merely that the summary table has now been fully populated. Our reasons for requesting the information to be superseded is to ensure that the FCC public record is complete and correct rather than a typographically incorrect report be on the public record.

We hope that you will be sympathetic to our reasoning and grant this supersede request.

Yours sincerely

Alan Binks  
Technical Director, BABT
