

Operation Description

The R/C Micro Quad is powered by 2 X 1.2V rechargeable battery. It operating at radio channel 49.860MHz and oscillated by LRC circuit. It can receive a radio signal and running to difference direction.

Refer to the circuit design, the circuit description is listed as below:

- Q11, Q1 and associate circuit act as Superregenerative circuit.
- AT3302R, Q10 and associate circuit act as decoder.
- Q2 ~ Q9 and associate circuit act as motor drive circuit.
