Notice\_content

-----  
Question #1: The EUT is USB flash memory with receiver built in. USB  
flash  
memory portion under FCC equipment class of JBP : Personal computer  
peripheral, and the receiver portion is under FCC equipment class of CYY  
:  
Communication receiver used with Part 15 transmitter. Based upon two  
FCC  
equipment classes on one device, this device shall be filed as composite  
applications. If the JBP portion is utilized FCC DoC procedures, please  
make sure to include FCC DoC labeling requirement on the FCC ID label  
format  
. In this case, this application will only cover CYY portion of review.

Since this device is composite device, two TCB assessment will be  
applied.  
Please confirm above assessment finding and inform what is desired  
action  
from the applicant.

Question #2: Please provide operational description as required for CYY application.

Question #3: Page 3 of test report indicates this device is intentional radiator but should be unintentional radiator. Please make necessary correction.

P.S. AN04T3684 transmitter portion of review has been done.

Best Regards

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
