

DIPOLE ANTENNA

- Omnidirectional
- Mounts Directly to AP, BDA, Basestation
- Includes Articulating Knuckle

RTN2400MRA

RTN2400MRA

Omnidirectional Fixed Point Dipole Antenna

This antenna has been configured specifically for fixed deployment, directly mounted to access points. As such, the antenna sets a new performance standard for antennas of its type. The antenna is equipped with an articulating knuckle allowing for both straight or right angle installation and the antenna's diminutive silhouette is both attractive and complimentary to the access point.

SPECIFICATION CHART

Frequency MHz	Impedance (Ohms)	Gain dBi	VSWR	Polarization	Beamwidth E-Plane	Connector Type	Dimensions In (cm)	Mount Style	Weight oz (g)
