RE: Nortel Networks

FCC ID: RVW2231

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide a cover letter explaining the purpose of the Permissive Change application. Please be sure this include a comparison of the new antennas to the original antennas. Additionally, if necessary please justify which antennas were required for testing.
- 2) Please provide the complete list of antennas as referenced in your email.
- 3) 1661 MHz on page 12 of the test report states this is a non-restricted band which is incorrect. Average measurements are also required for this frequency.
- 4) 1700 MHz on page 13 of the test report states this is a non-restricted band which is incorrect. Average measurements are also required for this frequency.
- 5) 2872 MHz on page 21 of the test report states this is a non-restricted band which is incorrect. Average measurements are also required for this frequency.
- 6) 1698 MHz on page 22 of the test report states this is a non-restricted band which is incorrect. Average measurements are also required for this frequency.
- 7) 2873 MHz on page 23 of the test report states this is a non-restricted band which is incorrect. Average measurements are also required for this frequency.
- 8) The Delta Measurement on page 33 for peak does not math the table information on page 25 & 26.
- 9) FYI....1125 MHz on page 19 of the test report states this is a non-restricted band which is incorrect. However, the peak measurement for this already meets the average limit.
- 10) FYI....1200 MHz on page 20 of the test report states this is a non-restricted band which is incorrect. However, the peak measurement for this already meets the average limit.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
