## 1. BASIC KNOWLEDGE

### 1.1 Introduction

Thank you for choosing our GSM / GPRS digital mobile phone. By reading this manual, you will have complete knowledge of your mobile phone and take advantage of its many features. We reserve the right to amend the content of this handbook without any previous notification.

### 1.2 Safety alert and Cautions

Please read the following safety precautions to use the phone correctly and avoid damage to the phone or personal injury.

#### ■Switch on the phone in safe places.

Switch off your phone when you are in potentially explosive areas such as "blasting areas" or where "Turn off two-way radio" is posted. Obey all signs and instructions.

#### ■Attention to traffic safety

According to new research, using your phone while driving can cause danger even if handset-free accessories, such as hands free or earphones are used so please avoid using your phone in such situations. When switching on the phone, its electromagnetic waves can affect negatively the vehicles' electronic system, such as ABS Explosion protection, Lock Brake System or Safety Airbag. To assure your safety at all times, please do not put the phone on the dashboard or in the airbag area. Please check with your car's manufacturer.

#### ■Interference

All phones may be affected by the external environment. Your phone may cause interference when placed near other electronic equipment such as TV, radio or personal computers.

#### ■Switch off in airplanes

Please switch off your phone at mobile phone prohibited places, such as airplanes or at hospitals, as it may cause interference in the navigation and medical equipments.

#### ■Switch off when refueling

Switch off the phone at a refueling point or any fueling or chemicals places.

#### ■Use Carefully

Don't touch the antenna unnecessarily. Don't let Children use the phone. Pregnant women are recommended to avoid prolonged usage of the phone.

■Enhancements and Batteries

Use only the approved accessories and batteries provided in you phone's box. Do not connect incompatible or unauthorized products to your mobile phone.

■Emergency Calls

Ensure the phone is switched on and in service when making an emergency call. Key in the corresponding emergency number of your country or area, then press the dial key. Once connected, tell your exact location to the operator in line. Do not hang up Without previously notifying so.

■Waterproof

Your phone is not waterproof; please don't expose the phone in bad weather (humidity, rain, liquid leakage, water mist, etc.).

**2. Menu operations**

**2.1. Alarm**

When you mobile phone is off, if the battery has sufficient power, the alarm will continue working. You can set five alarms; you may turn on one or all of them as you wish. Each alarm can be set individually.

When the alarm time is up, the handset will sound. Press stop button then it can stop ringing.

If, say, the time you set is up but the handset is off at that moment, it will automatically turn on and ring the pre-set alarm. If you press stop, the handset will inquire if you want to turn on the device. If you Press "No" the handset will stay off, otherwise, by touching "Yes," It will immediately power on.

**2.2. App.icon**

Application icons: Can setup of pictures without application Choose will tip "Running applications might be stopped and back to idle continue".

**2.3. Browser**

Please consult your local network service operators about charges and specific settings. This phone provides default settings document, if you cannot use, please consult local network operators depending on different network services

Click OK, operated as follows:

- Home: Login default website
- Bookmarks: store frequently used websites.
  - 1) - to enter: Click OK, visit the website.
  - 2) - View: View bookmark's title and address.
  - 3) - add a new bookmark: Add new bookmark
  - 4) - Homepage: this bookmark set as your home.
  - 5) - Memory status: check up the available and already used bytes.
- Input address: input the address; click the OK button to the network.
- Web History: After browsing the preservation of records.
- Service inbox: means website message send to users.
- Setting:

You can set the follow

Select the SIM card, edit the settings file, browse options, preferences settings, security settings, and the service message.

#### **2.4. Calculator**

**You can do the following operations:**

Press the “#” button to enter a decimal point; press the right soft button to delete character; press the calling button to delete number; press the left soft button to multiply; press the up/down button to addition/subtract .

4. Copy contacts: copies the contacts from phone to SIM card or from SIM card to phone.

5. Move contacts: moves the contacts from phone to SIM card or from SIM card to phone

6. Delete all contacts: delete all contacts from SIM card or phone

he SIM Card 1 and SIM Card 2 for local

#### **2.10. Dialer**

In this interface to enter the Digital number: Can be saved to the telephone directory, dial a phone

#### **2.11. FM radio**

In the FM radio screen, you can:

Press the up and down buttons to switch broadcast channels;

Press the side buttons to adjust the volume;

Press the OK button to stop or play;

Press the right soft button to search new channels and your phone can reserve the new channel after research;

Press the left soft button to consult channels and can chose which channel to broadcast;

Press the end button to close FM radio.

Note: The quality of the FM radio is influenced by the range of the broadcasting station.

#### **2.12. File manager**

Our phone provides you space to store files it also supports memory card. Enter File manager under the main menu and select the following options:

➤ Open: open the storage card

➤ Format: to format all the files in the memory card.

➤ Be cautious, all the data cannot be restored if formatted!

➤ Rename: rename the memory card.

➤ Details: shows the name and available space of the memory card

Contents of root directory in T card as follow:

M y music: audio files kept directory

Videos: video files kept directory

Photos: photos kept directory

EBook: eBook kept directory

Note: delete the documents of T card will cause certain functions out of condition.

### **2.13. Gallery**

#### **My shootings:**

pictures :View pictures files

videos: Play the current video files.

#### **My pictures**

Rotate: View photos can rotate to check

Share :you can send the phone by MMS or Bluetooth.

Set as :use the phone as wallpaper, screen saver ,boot animation, shutdown animation or call picture.

Delete: Delete the picture chosen

#### **My videos:**

Play the current video files.

### **2.14. Lock**

choose the keyboard locked style

### **2.15. Messaging**

The Messaging function is a network service. Sending and receiving Text/MMS can only be used if the service is proposed by your network operator.

#### • Text Messages (SMS)

You create SMS messages in this menu. You can:

Please notice that some cities or regions do not support text messages.

Press the “#” button to switch the input method, press the“\*” button to enter

symbols, press the right soft button to clear the character;

• Intelligent Button "?" has fuzzy input function. Press the button "?" means input unclear strokes.

**■ Insert symbol**

Press the " \* " button to bring up symbols. In ABC interface, continuously press the " ! " button to enter common symbols.

**5. Accessories****■ Battery**

Extra batteries of various capacities are available from our company or through specific dealers.

**■ Charger**

Light weight, practical quick chargers used for charging on wall outlets. The charging condition is being displayed on screen. You may use your phone while

charging.

■**Headset**

Please use the original headset.

■**USB cable**

USB cable is used to connect with the phone and the computer; it can also be used as a charger when connected to the computer.

**6. Maintenance and Care**

■**Caring for Battery**

- This phone uses a rechargeable battery as power source. When the battery is weak, recharge immediately to protect the battery life. It is best to let the battery drain first to preserve its effectiveness.
- When not using the charger, unplug it from the power source and the phone. Overcharging will shorten the battery life. Do not leave the charger connected to the unit or battery for more than one week.
- Temperature affects battery capacity. Your battery may need to be warm up or cool down before charging. If the battery temperature is higher than 40°C, it cannot be recharged.
- Use the battery as it is originally intended. Do not short circuit the battery by connecting the positive and negative terminals with a conductor.
- Do not use a damaged battery to power on your phone!

The battery will not perform properly and its life will be shortened if exposed to extreme temperatures.

- Do not place the battery in fire; follow local laws and ordinances in disposing of used battery.

■**Maintenance**

- Do not leave your phone within the reach of small children (certain removable parts may be accidentally ingested or cause skin damage).
- Do not use your phone in damp areas (bathroom, swimming pool...). Protect it from liquids and other moisture.
- Do not expose your phone to extreme temperatures.

- Do not attempt to open cell phone case or disintegrate the phone. Non-professional demolition may cause damage to the body
- Do not use acid or strong alkaline to clean your phone.

#### **7. Safety**

Usage of your phone is subject to safety measures designed to protect users and their environment.

##### **Road safety**

Do not use your phone when driving. In order to give your full attention to driving, stop and park safely before making a call. You must comply with any current legislation

##### **Aircraft safety**

When travelling by plane, you will need to switch your phone off when instructed by the cabin crew or the warning signs. Using a mobile phone may be dangerous to the operation of the aircraft and may disrupt the phone network. Its use is illegal and you could be prosecuted or banned from using cellular networks in the future if you do not abide by these regulations.

##### **Environment safety**

- Do remember to comply with current special regulations in any place. Switch off your phone in areas where mobile phones are prohibited or the use of phones may cause interference or danger to other equipments or materials.
- The use of any radio transmitting equipment, including cellular phones, may interfere or negatively affect any sinadequately protected medical device. For further information regarding this safety note please consult to physician or medical device manufacturer.
- Your phone is a radio transmitter which may interfere with electronic medical equipment implants, such as hearing aids, pacemakers, insulin pumps, etc. Your doctor or the manufacturers of such equipment will be able to give you any advice you may need regarding this safety procedure.
- Remember to turn off your phone in any area with a potentially explosive atmosphere, such as gas stations or chemical plants.

Regarding this Manual

Our company reserves the right to interpret the contents of this manual.  
Please read and use carefully if further assistance is needed while using your  
phone. Thank you.

**FCC RF EXPOSURE INFORMATION:**

**WARNING!! Read this information before using your phone**

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

**BODY-WORN OPERATION:**

This device was tested for typical body-worn operations with the back of the phone kept 1.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 1.5cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

For more information about RF exposure, please visit the FCC website at [www.fcc.gov](http://www.fcc.gov)

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

**NORMAL POSITION:**

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

**TIPS ON EFFICIENT OPERATION:**

For your phone to operate most efficiently:

- Extend your antenna fully.
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

# RF Exposure Information:

FCC RF Exposure requirements:

The device complies to the RF Exposure requirements and refer to the FCC database (link web site) and FCC ID for further details.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Ad Hoc function is supported but not able to operate on non-US frequencies.---WIFI

Do not use the device with the environment which below minimum -10°C or maximum over 50, the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
