

American Certification Body Inc.
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

ACB:

Please help to explain the label on the battery drawer. In the original certification from 2012 the FCC ID is written on the side of the key. On the new document you have provided with this C2PC project, it looks like it is on a different part of the key.

Applicant:

It is correct, the FCC ID is now on the side of the key.

ACB:

The External Photos of the product (in section 3 of your TSupPhotos document) looks different to the online photos from the original certification from 2012.

Applicant:

The external logo can change, if change the client.

ACB:

The Internal Photos of the product in the test report photos shows a green wire across the chip.

Applicant:

The green wire is needed to set the remote key in continuous transmission mode for perform the test.
