RE: PLX Devices

FCC ID: RX6PLX001

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The device shown in the external and internal photographs does not appear present in the test configuration photographs. It appears that the RX portion of the system is shown and not the TX. Where is the EUT? Additionally, what is the placement of the antenna. Please note that the antenna must not simply be laying on the table top, but must be representative of installation.
- 2) Please explain if the modifications needed are shown in the schematic. If not, please provide further information or schematics as necessary to document the modification.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
