RE: PLX Devices

FCC ID: RX6PLX001

After a review of the submitted information, I have a few comments on the above referenced Application.

1) The device shown in the external and internal photographs does not appear present in the test configuration photographs. It appears that the RX portion of the system is shown and not the TX. Where is the EUT? Additionally, what is the placement of the antenna. Please note that the antenna must not simply be laying on the table top, but must be representative of installation.

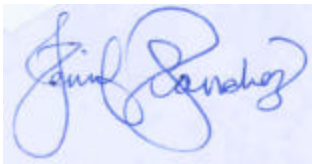

Sorry, this was my mistake. I have corrected the file to include the TX photos.

2) Please explain if the modifications needed are shown in the schematic. If not, please provide further information or schematics as necessary to document the modification.

Yes, the modifications needed are already shown on the current schematic.

If you need anything else, please let me know.

Thank You

A handwritten signature in blue ink, appearing to read "Jennifer Sanchez", is written over a light blue rectangular background.
