

WFG-200 Operation Descriptions

- a. This device is Bluetooth audio receiver.
- b. This device output is audio through earphone jack(J300).
- c. Audio amp.(U300) Output is 21mWatt.
- d. Data communication consists of A2DP by Bluetooth chip set.
- e. Man Machine Interfaces consist of Multi Function button(SW_POWER) & LED(LED_BLUE1).
- f. DC IN (J200) is 5Vdc(100mA)
- g. LDO(U210) output volts is 3.3V.
- h. EEPROM(U151) is 32Kbits.
- i. Main Clock(X101) is 26MHz.
