Description of laser Marking

- 1) Manufacturer : TAIYO YUDEN
- 2) Model : EYSPJN
- 3) User-code : User-code
- 4) Product Lot number : Four digits (Refer to [Instruction for Lot Number])
- 5) 1 pin mark

Marking of ID number :

It is impossible to put a label on this very small shielding case. Therefore the marking of model number and user code is written by LASER marker. It needs to consider about alignment accuracy as well. The traceability requirement in quality control under ISO standard is secured by the Lot number, the Model number and user code marking on each product. The marking can be not removed by our company regulation for product management. Putting on this together, marking of ID number on this shielding case with 4.4mm width is impossible. It's describe on a user's manual because it isn't possible to indicated " FCC:RYYEYSPJN ".
