RF Safety Requirements to 2.1091 for Mobile Transmitters

According to Section 3 of Supplement C to OET Bulletin 65, Part 15 Transmitters are categorically excluded from Routine Environmental Evaluation by measurement or precise computations unless otherwise required by the Commissions

The unit under evaluation has a antenna gain of $\leq 3\text{dBi}$ gain with a measured 7.1mW output power and is less than 20 mW. The EUT operation range is greater 20 cm.

Due to the low power of the EUT, environmental evaluation should be deemed unnecessary since the EUT's operational frequency range is 2.412-2.462 GHz and the ERP is considerably less than 5 Watts.
