Dear Helen,

Thank you for your mail.  
Attached please find the revise test report and operational description.  
We chose 8DPSK as worse case to perform the test.  
Thank you.

Best regards,  
Joe

Question #1: The test report indicates this bluetooth chip has EDR function.  
The operation description in the filing is so simple, does not provide the information as what kind of modulation it supports. Please submit a detailed operational description. You may need to perform test with each modulation it supports. For example, base mode: GFSK, EDR mode: QPSK and 8DPSK. At least two full sets of test data should be provided: GFSK, and the worse case of QPSK and 8DPSK.

Best Regards,  
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted.  
Any questions about the content of this correspondence should be

directed to  
the e-mail address listed below the name of the sender.
