Hi, Chris.

Here are the answers for your questions. Please let me know if we can have the approval soon. Thanks.

Wei

Wei,

I have reviewed the above referenced TCB application and find that the following items need to be addressed before the application review can be completed:

1. Please provide photographs that are in focus.

SEE ATTACHED PHOTOS IN JPEG FORMAT. WHEN I CHANGE TO PDF, IT LOSE THE RESOLUTION.

2. This device has 2 antenna connectors for the DownLink band (server antennas) which seem to both be transmitting the same signal at the same time at the full +7dBm each. Please provide a better description of the 2 DL antenna ports, explaining if there is simultaneous transmission, if the signals are identical, if the signals are synchronized (or out of phase), how RF exposure is addressed, antenna installation guidance, possible addition of signals if coherent, and other issues to help clarify this situation.

2DL ANTENNA PORTS ARE IDENTICAL WHICH IS JUST DIVIDED BY STANDARD 3DB DIVIDER/COMBINER. TWO DL ANTENNAS WILL BE INSTALLED IN DIFFERENT ROOMS AT MINIMUM 10-FT DISTANCE. EACH ANTENNA INSTALLATION FOLLOWS THE SAME PROCEDURE AS DESCRIBED IN THE MANUAL. RF MPE LIMIT WILL BE THE SAME FOR EACH DL ANTENNA AS DESCRIBED IN MPE CALCULATION.

3. The user's manual specifications list the power for the DL band twice and nothing for the UL band. If this is a typo, please correct this specification.

IT'S TYPO. PLEASE SEE THE CORRECT ONE ATTACHED.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
