Overall Assessment Letter for TomTom International B.V. GO740LIVE
FCC id: S4L-4CF7

I have reviewed this application and find it compliant.

This is an application for a GPS Navigation System which supports GSM/GPRS 850/1900 and Bluetooth. The device also supports GSM 900 and DCS 1800, however are not relevant as they are not supported in North America.

As a result of the assessment review, several additional exhibits were submitted. An exhibit which shows the label positioning on the device was requested. Test set-up photos were updated and submitted which show a wide-angle view of the antennae and turn-table for radiated emissions. The original block diagram which was submitted, showed details of an FM Transmitter, however an updated exhibit has been received and the client has confirmed that the device does not support an FM transmitter function in this model.

I underwent the FCC RF exposure training with the FCC in October 2008.

Yours sincerely

Vina Kerai
Compliance Engineer, BABT
