Before you start

Switching on

Follow the instructions at the start of this manual to dock your TomTom in your car stereo. Your TomTom can also be used without docking it in your car stereo. A mount is available as an accessory so that you can use your TomTom in other cars.

The first time you switch on your TomTom, it may take up to 20 seconds to start. To switch off your TomTom, press and hold the On/Off button for 2 seconds.

Setting up

To set up your navigation device, you need to answer a few questions by tapping the screen.

Important: Take care to select the correct language, since the language you choose will be used for all menus and written instructions.

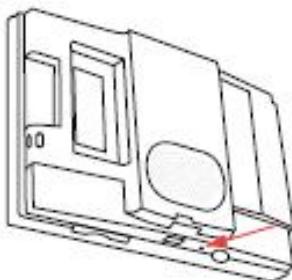

See the Installation Poster for information on installing your TomTom in your car.

Troubleshooting

Always make sure that you are using the latest version of the TomTom application on your TomTom. You can update the application using TomTom HOME.

If you have problems turning on your TomTom, try resetting your TomTom.

To reset your TomTom, use a straightened paper clip, or something similar, to push the reset button. The reset button is on the bottom of your TomTom. Then turn on your TomTom.

Before you start

Improving reception

If your TomTom takes longer than 5 minutes to find your current position, make sure that the device is in an open space away from tall objects such as buildings or trees.

When you connect your TomTom to your computer, you can use TomTom HOME to download information about GPS satellite positions during the next 7 days. This helps your TomTom to find your position faster.

Take care of your TomTom

Never leave your TomTom or accessories in view when you leave the car or they may become an easy target for thieves.

You can set a password for your TomTom which must be entered every time you start your TomTom.

It is important to take care of your TomTom.

- Your TomTom is not designed for use in extreme temperatures and any such exposure may cause permanent damage.
- Do not open the casing of your TomTom under any circumstances. Doing so may be dangerous and will invalidate the warranty.
- Wipe or dry the screen of your TomTom using a soft cloth. Do not use any liquid cleaners.

Light sensor

Your TomTom uses a light sensor to detect the background light level and can automatically adjust the brightness of the screen and switch to night view.

To use the light sensor to make these changes, tap Brightness preferences in the Preferences menu. You can then select these options:

- Turn brightness down when dark
- Switch to night view when dark

Link night view to headlights

If you select Link night view to headlights in the settings on your car stereo, your TomTom will switch to night view when you switch on the headlights in your car. See the manual for your car stereo for information about the settings.

Making your first trip

Planning a route with your TomTom is easy. To plan your first route, follow the steps below.

Important: You should always plan your journey before you start driving. It is dangerous to plan a route while driving.

1. Tap the screen to bring up the main menu.

Note: The buttons on your TomTom are shown in full color unless a button is currently unavailable. For example, the button named Find alternative... in the Main Menu is not available until you have planned a route.

2. Tap **Navigate to...**

3. Tap **Address**.

In this example, we will enter an exact address.

4. Tap **Street and house number**.

Note: When planning a trip for the first time your TomTom asks you to choose a country. Your choice is saved and used for all routes you plan.

You can change this setting at any time by tapping the country flag.

Making your first trip

5. Start to type the name of the town where you want to go. Tap the name when it is shown in the list.

Tip: Instead of typing the name, tap this button to say the address by speaking to your TomTom.

6. Start to type the name of the street and select it when it is shown.
7. Now enter the house number of your destination and then tap Done.
8. Your TomTom asks if you need to arrive at a particular time. For this exercise, tap NO. The route is calculated by your TomTom.
9. When the route has been calculated, tap Done.

Your TomTom will immediately begin to guide you to your destination, using both spoken instructions and on-screen directions.

EN

Using the car stereo

The car stereo uses the TomTom navigation device to display information, play videos, and show controls.

Through your TomTom navigation device, you can control the following:

- The radio
- The audio CD/CD-ROM/DVD player
- An iPod
- Music stored on a USB stick

For full details, see the owner's manual included with the car stereo.

Switching to audio

To use your TomTom navigation device to control your car stereo, press and immediately release the Screen button on the car stereo. You can switch back to the navigation functions at any time by pressing the Screen button again. To switch to other audio input sources, press the Source button on the car stereo.

The volume of all sound is set by the volume control on the car stereo. You can adjust the volume of spoken instructions separately by changing the volume on your TomTom navigation device.

Using the radio

Your TomTom navigation device shows the radio station that you are tuned to and the frequency.

You can save a station to a preset station. There are 6 presets per radio band. To save a frequency, press and hold the number that you want to use to save the frequency. When the color of the button changes, the frequency is saved.

Using an iPod® and USB storage devices

You can use your TomTom navigation device to play songs and videos saved on an iPod® and songs stored on a USB storage device. The cable for connecting an iPod to your car stereo is available as an accessory.

Note: Your TomTom must be docked in the car stereo to play back music or videos stored on an iPod® or USB storage device.

EN

Using the car stereo

When you connect an iPod® or USB storage device and select one of these as the audio input source, your car stereo starts to play the first song on the iPod® or USB storage device.

To select your iPod® or USB storage device, press the Source button on your car stereo until iPod or USB is shown on your TomTom device. To select the song to play, tap Select. You can then choose the songs you want to listen to.

- Playlist - tap this button to select a playlist.

Note: You can create playlists in a third-party application like iTunes®, Musicmatch® or Winamp®.

- Song - tap this button to select from all the songs.
- Artist - tap this button to select a song by a particular singer or group.
- Genre - tap this button to select a particular type of music.

- Album - tap this button to select from a list of all the albums.
- Audiobooks - tap this button to select an Audiobook. Audiobooks can be played from an iPod.
- Video - tap this button to play videos stored on your iPod. Videos stored on a USB storage device cannot be played.

Important: You should not select songs or videos, or watch videos while driving as this is dangerous.

To skip to the next or previous song, use the controls on the car stereo.

Note: Not all mp3 files contain information about the song, such as the artist or genre. If the file contains no information, the file name is used as the song title.

EN

Driving View

When your TomTom starts, you are shown the Driving View along with detailed information about your current location.

Tap the center of the screen at any time to open the Main Menu.

Note: The Driving View is shown in black and white until your TomTom locates your current position.

- Ⓐ Tap + and - to zoom in and out.
- Ⓑ Quick menu - switch this on in the Preferences menu.
- Ⓒ Your current position.
- Ⓓ The name of the next major road or road sign information, if applicable.
- Ⓔ Traffic bar - traffic information is available either through the stereo using RDS-TMC or from TomTom Traffic. TomTom Traffic

requires a Bluetooth®-enabled mobile phone. For more information about how to subscribe to and receive TomTom Traffic, go to tomtom.com/traffic.

To set up traffic information, tap TomTom Traffic in the Main Menu.

- Ⓕ Navigation instruction for the road ahead.

Tap this area to repeat the last spoken instruction and to change the volume.

- Ⓖ The name of the street you are on.

- Ⓗ Information about your trip such as trip time, remaining distance and arrival time.

To change the information shown, tap Status bar preferences in the Preferences menu.

- Ⓘ GPS signal strength.

Menus

Main menu

Tap the screen at any time when TomTom displays the Driving View to open the Main Menu.

- **Navigate to...**

Tap this button to start planning a route.

- **Find alternative...**

Tap this button if you want to avoid part of your route, travel via a specific location or calculate an alternative route.

- **Help me!**

Help me! provides an easy way for you to find and contact emergency service centers and other special services.

- **Mobile phone**

This button opens the mobile phone menu. You can, for example, make calls, and write or read messages.

- **Change preferences**

This button opens the Preferences menu. You can change many things about the way TomTom looks and behaves.

EN

Hidden buttons and features

When you first start using your TomTom, not all the buttons will be shown in the menu.

Many buttons and some more advanced features are hidden because you will not need these features very often.

To show all buttons and features, tap Show ALL menu options in the Preferences menu.

To hide these buttons again, tap Show fewer menu options in the Preferences menu.

EN

TomTom Traffic

TomTom Traffic is a TomTom Service, available as a subscription, for receiving up-to-date traffic information from the best local sources.

Note: TomTom Traffic is not available in all countries or areas. Go to tomtom.com/services to check availability in your country.

To use TomTom Traffic, you will need to establish a wireless data connection (GPRS, EDGE, UMTS, CDMA) between your TomTom device and a Bluetooth enabled mobile phone and you must have a wireless data subscription with your mobile network operator. For more information, go to tomtom.com/phones

To use TomTom Traffic, do the following:

1. Tap TomTom Traffic in the Main Menu.

You will be prompted to set up a wireless data connection with your mobile phone, and then to enter your MyTomTom account details.

2. Tap Enable Traffic.

Introducing TomTom HOME

TomTom HOME is a free application for your computer that helps you manage the contents of your TomTom device. Connect to HOME frequently to get the latest updates for your device.

Tip: To get the most from HOME, we recommend using a broadband internet connection.

Installing TomTom HOME

To install TomTom HOME on your computer, do the following:

1. Connect your computer to the internet.
2. Connect your device to your computer using the USB cable, then switch your device on.

HOME starts to install.

Note: If HOME does not install automatically, you can also download it from tomtom.com/home

You can also install TomTom HOME from the CD supplied.

Once installed, TomTom HOME starts automatically when you connect your device to your computer and turn it on.

MyTomTom Account

In order to buy content and services through TomTom HOME you will have to set up a MyTomTom account for the device you want to buy the content for. You will be asked to create an account when you start using TomTom HOME.

Discover more

TomTom Map Share™

With Map corrections, you can change the map on your TomTom, for example:

- Block and unblock streets.
- Change the traffic direction of a one-way street.
- Add or change a street name.

With TomTom HOME you can join the TomTom Map Share community to share your corrections and use Map corrections made by others.

Note: TomTom Map Share is not available in all regions. For more information, go to tomtom.com/mapshare

Help me!

Help me! provides an easy way for you to find and contact emergency service centers and other special services.

Help me! also includes a selection of useful documents covering topics such as First Aid and car maintenance.

Hands-free calling

If you have a cell phone with Bluetooth, you can use your TomTom to make phone calls and send and receive messages.

To establish a connection between your mobile phone and your TomTom, tap Mobile phone in the Main Menu, then follow the instructions on the screen.

For a list of supported phones, go to tomtom.com/phones.

Safety preferences

Take a look at the safety preferences. These will help you enjoy using your TomTom while you concentrate on driving safely.

We strongly recommend that you consider using the Safety preferences which can be found in the Preferences menu.

Addendum

Important Safety Notices and Warnings

Global Positioning System

The Global Positioning System (GPS) is a satellite-based system that provides location and timing information around the globe. GPS is operated and controlled under the sole responsibility of the Government of the United States of America, which is responsible for its availability and accuracy. Any changes in GPS availability and accuracy, or in environmental conditions, may impact the operation of your TomTom device. TomTom does not accept any liability for the availability and accuracy of GPS.

Use with Care

Use of a TomTom device for navigation still means that you need to drive with due care and attention.

Aircraft and Hospitals

Use of devices with an antenna is prohibited on most aircraft, in many hospitals and in many other locations. A TomTom device must not be used in these environments.

Battery

This product uses a Lithium-Polymer battery. Do not use it in a humid, wet and/or corrosive environment. Do not put, store or leave your product or near a heat source, in a high temperature location, in strong direct sunlight, in a microwave oven or in a pressurized container, and do not expose it to temperatures above 60 °C (140 °F). Failure to follow these guidelines can cause the Lithium-Polymer battery to leak fluid, become hot, explode or ignite and cause injury and/or damage. Do not pierce, open or disassemble the battery. If the battery leaks and you come into contact with the leaked fluids, rinse thoroughly with water and seek medical attention immediately. For safety reasons, and to prolong the lifetime of the battery, charging will not occur at low (below 0 °C/32 °F) or high (over 45 °C/113 °F) temperatures.

Temperatures: Standard operation: -10 °C (14 °F) to +55 °C (131 °F); short period storage: -20 °C (-4 °F) to +60 °C (140 °F); long period storage: -20 °C (-4 °F) to +25 °C (77 °F).

THE LITHIUM-POLYMER BATTERY CONTAINED IN THE PRODUCT MUST BE RECYCLED OR DISPOSED OF PROPERLY. USE YOUR TomTom ONLY WITH THE SUPPLIED DC POWER CABLE (CAR CHARGER/BATTERY CABLE) AND AC ADAPTER (HOME CHARGER) FOR BATTERY CHARGING.

To recycle your TomTom unit please see your local approved TomTom service center.

SPECIAL NOTE REGARDING DRIVING IN CALIFORNIA AND MINNESOTA

California Vehicle Code Section 26708 (a) (1) provides that "No persons shall drive any motor vehicle with an object or material placed, displayed, installed, affixed or applied upon the windshield or side or rear windows." Drivers in California should not use a suction mount on their windshield, side or rear windows.

Note: this section of the California Vehicle Code applies to anyone driving in California, not just California residents.

Minnesota State Legislature Statutes Section 169.71, subdivision 1, section 2 provides that "A person shall not drive or operate with any objects suspended between the driver and the windshield other than sun visors and rearview mirrors and electronic toll collection devices."

Note: this Minnesota Statute applies to anyone driving in Minnesota, not just Minnesota residents.

TomTom Inc. bears no responsibility for any fines, penalties or damage that may be incurred by disregarding this notice. While driving in any state with windshield mounting restrictions, TomTom recommends the use of the supplied Adhesive Mounting Disk or its Alternative Mounting Kit, which includes multiple options for mounting TomTom devices on the dashboard and using the air vents. See www.tomtom.com for more information about this mounting option.

FCC Information for the User

This product contains a transmitter which must not be co-located or simultaneously operated in conjunction with any other transmitter.

Exposure to Radio Frequency Radiation

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 8 inches (20 cm) during normal operation.

Radio and Television Interference

This equipment radiates radio frequency energy and if not used properly - that is, in strict accordance with the instructions in this manual - may cause interference to radio communications and television reception.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation distance between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Important

This equipment was tested for FCC compliance under conditions that included the use of shielded cables and connectors between it and the peripherals. It is important that you use shielded cables and connectors to reduce the possibility of causing radio and television interference. Shielded cables are suitable for professional range and can be obtained from an authorized dealer. If the user modifies the equipment in any way, or connects it to any unauthorized peripheral, or if the user moves the equipment to another location, the FCC may withdraw the user's right to operate the equipment. For customers in the USA, the following booklet prepared by the Federal Communications Commission may be of help: "How to Identify and Resolve Radio-TV Interference Problems". This booklet is available from the US Government Printing Office, Washington, DC 20402, Stock No 004-000-00345-4.

FCC Declaration of Conformity

Tested to comply with FCC Standards for Home or Office Use

FCC ID: S4LDU81

IC ID: 5767A-DUB1

Addendum

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Responsible party in North America

TomTom, Inc., 150 Baker Avenue Extension, Concord, MA 01742
Tel: 866 486-6866 option 1 (1-866-4-TomTom)

Emissions information for Canada

This Class B digital apparatus complies with Canadian ICES-003.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This category II radiocommunication device complies with Industry Canada Standard RSS-310.

CE Marking

This equipment complies with the requirements for CE marking when used in a residential, commercial, vehicular or light industrial environment.

RoHS directive

TomTom hereby declares that the devices listed above are in compliance with the essential requirements and other relevant provisions of the EU Directive 1999/5/EC.

WEEE directive

This symbol on the product or its packaging indicates that this product shall not be treated as household waste. In line with EU Directive 2002/96/EC for waste electrical and electronic equipment (WEEE), this electrical product must not be disposed of as unsorted municipal waste. Please dispose of this product by returning it to the point of sale or to your local municipal collection point for recycling.

C-tick

N14644
Z468

This product displays the C-tick to show it complies with relevant Australian and New Zealand regulations.

This Document

Great care was taken in preparing this manual. Constant product development may mean that some information is not entirely up-to-date. The information in this document is subject to change without notice.

TomTom shall not be liable for technical or editorial errors or omissions contained herein; nor for incidental or consequential damages resulting from the performance or use of this material.
