Re: Model Number Justification Letter

**TYPE OF EQUIPMENT: NL-1210/NL-1211**  
**FCC IDENTIFIER: S52-7-12-12-00-1**

To Whom It May Concern:

Star Solutions International hereby acknowledges that the NL-1210 model and the NL-1211 model are the same products, but for the NL-1210 model, the components were removed are listed in the BD-TN-0302 LTE FDD COMPAC-N Supplemental Operational Description BC12.pdf document.

The NL-1210 produces the same or less emissions than the NL-1211, for the following reasons:

- The CPU component that was removed only performs data manipulation tasks such as determining if the user is allowed to make a call or not (EPC tasks).
- The GPS module that was removed is only required for getting location coordinates.

The NL-1211 model is the worst-case product configuration, and this configuration was provided for qualification testing to QAI. The components that are removed are not part of the LTE RF circuit.

Sincerely,
