Re: Model Number Justification Letter

TYPE OF EQUIPMENT: NL-2510/NL-2511
FCC IDENTIFIER: S52-7-12-25-00-1

To Whom It May Concern:

Star Solutions International hereby acknowledges that the NL-2510 model and the NL-2511 model are the same products, but for the NL-2510 model, the components were removed are listed in the BD-TN-0302 LTE FDD COMPAC-N Supplemental Operational Description BC25.pdf document.

The NL-2510 produces the same or less emissions than the NL-2511, for the following reasons:

- The CPU component that was removed only performs data manipulation tasks such as determining if the user is allowed to make a call or not (EPC tasks).
- The GPS module that was removed is only required for getting location coordinates.

The NL-2511 model is the worst-case product configuration, and this configuration was provided for qualification testing to QAI. The components that are removed are not part of the LTE RF circuit.

Sincerely,

Randeep Chatha | Randeep.chatha@starsolutions.com
