Re: Model Number Justification Letter

TYPE OF EQUIPMENT: NL-6610/NL-6611
FCC IDENTIFIER: S52-7-12-66-00-1

To Whom It May Concern:

Star Solutions International hereby acknowledges that the NL-6610 model and the NL-6611 model are the same products, but for the NL-6610 model, the components were removed are listed in the BD-TN-0302 LTE FDD COMPAC-N Supplemental Operational Description 66.pdf document.

The NL-6610 produces the same or less emissions than the NL-6611, for the following reasons:

- The CPU component that was removed only performs data manipulation tasks such as determining if the user is allowed to make a call or not (EPC tasks).
- The GPS module that was removed is only required for getting location coordinates.

The NL-6611 model is the worst-case product configuration, and this configuration was provided for qualification testing to QAI. The components that are removed are not part of the LTE RF circuit.

Sincerely,

[Randeep Chatha](mailto:Randeep.chatha@starsolutions.com) | Randeep.chatha@starsolutions.com
