# Product Information

## Safety and Compliance Information

[Insert user instructions for safe use of the product.]

### Using Your Product Around Other Electronic Devices

Product generates, uses, and can radiate radio frequency (RF) energy and, if not used in accordance with its instructions, may cause interference to radio communications and electronic equipment. External RF signals may affect improperly installed or inadequately shielded electronic operating systems, entertainment systems, and personal medical devices. While most modern electronic equipment is shielded from external RF signals, if in doubt, check with the manufacturer. For personal medical devices (such as pacemakers and hearing aids), consult with your physician or the manufacturer to determine if they are adequately shielded from external RF signals.

There are some places where RF signals could constitute a hazard, such as health care facilities, and construction sites. If you are not sure, look around for signs indicating that two-way radios or mobile phones should be turned off.

This device should be installed and operated with at least 20cm between the radiator and your body and is restricted to indoor use when operating in the 5.15 to 5.25 GHz frequency band.

### FCC Compliance Statement

The Product and its related accessories like the remote and the adaptor (the “Products”) comply with part 15 of the FCC Rules. Operation of each Product is subject to the following two conditions: (1) each Product may not cause harmful interference, and (2) each Product must accept any interference received, including interference that may cause undesired operation.

Note: The Products have been tested and found to comply with the limits for a Class B digital device or external switching power supply, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. The Products generate, use and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If a Product does cause harmful interference to radio or television reception, which can be determined by unplugging and plugging in the Product, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to a Product by the user that are not expressly approved by the party responsible for compliance could make the Product no longer comply with the FCC Rules.

The Product and the remote meet the FCC Radio Frequency Emission Guidelines and are certified with the FCC. Information on these Products is on file with the FCC and can be found by inputting such Product's FCC ID (which can be found on the back of the Product or in the battery compartment of the remote) into the FCC ID Search form available at [transition.fcc.gov/oet/ea/fccid](http://transition.fcc.gov/oet/ea/fccid).

### **Information Regarding Exposure to Radio Frequency Energy**

The output power of the radio technology used in the Products is below the radio frequency exposure limits set by the FCC. Nevertheless, it is advised to use the Products in such a manner that minimizes the potential for human contact during normal operation.

### **Recycling Product Properly**

In some areas, the disposal of certain electronic devices is regulated. Make sure you dispose of or recycle the Products in accordance with your local laws and regulations. For information about recycling the Products, go to [Insert URL].

### **Product Specifications**

**Ports:** HDMI, Optical Audio, Ethernet, USB

**Video — [Supported Formats]**

**Audio — [Supported Formats]**

**Power —** AC power adaptor

**Connectivity —** Dual Band (2.4/5 GHz) SISO 802.11 a/b/g/n or Ethernet

**Operating temperature —** 0 °C to 40 °C

**Storage temperature —** [TO BE DETERMINED]
