Subject: BluTag 5 FCC Certification, FCC ID: S5E0906BT5

To whom it may concern

This is to certify that the results of ERP Testing on the 850 MHz are as expected. STOP uses its own dual band antenna that has been optimized for the 1900 MHz network of our preferred provider in the US. We can confirm that our own testing of further samples show a similar performance in that frequency and is due to losses in the antenna. It is also noted that our previous version of Blutag tested in 2005 showed a similar difference in the performance of the 850MHz and 1900 MHz frequency.

Yours sincerely
