About This User Guide

- Some of the contents of this guide may appear differently on your device. Your actual device may differ from the illustration, depending on the software and your service provider. All information in this document is subject to change without prior notice.
- Your device's applications and their functions may vary by country, region, or hardware specifications. TabletExpress cannot be held liable for performance or incompatibility issues resulting from edited registry settings being edited or operating system software being modified. Any attempt to customize your operating system may cause the device or its applications to not work as they should.

Important

- We do not suggest you reinstalling the system. You may contact TabletExpress support if reinstallation is necessary.
- You may not disassemble the device in any circumstance.
- Please keep your device away from fire, water or any extreme weather condition.
- Please avoid any heavy object or hard press on front face of your device.

Disclaimer of Warranties

TabletExpress shall not be liable for any damages of any kind resulting from the purchase or use the product or arising from the breach of the express warranty, including incidental, special or consequential damages, or loss of anticipated profits or benefits. TabletExpress is not liable for performance issues or incompatibilities caused by your editing or registry settings, or your modification of operating system software. Using custom operating system software may cause your device and applications to work improperly.

I. Getting started

1.1 Turn On/Off

Turn On

To start your tablet, press and hold the power key for 5-10secs, then release the power button.

Turn off

To power off your tablet, press and hold the power button until the option menu appears. Tap 'Power Off' to turn off your device.

1.2 Sleep Mode

To save battery, you may put your device in sleep mode by shortly pressing the power key, then screen will go to dark. Press it again you can wake up the screen. If there are any programs running when you lock your screen, they may be still running in sleep mode. It is recommended that you exit all programs before entering sleep mode to avoid unnecessary charges.

II. Home Screen

- ① Back: Press to check previous operating display
- ② Home Screen: Press to go to home screen
- ③ Background: Press to check applications running on background. Existing idle Apps may provide a better performance
- ④ Application Panel: Press to check all available Applications

2.1 Wallpaper

Tap and hold your finger in any blank space of the home screen, you will see a pop-up menu; you can choose wallpaper from Gallery or your downloaded files or those listed as options; set the one you like to be wall paper.

2.2 Widgets

Tap and hold your finger in any blank space of home screen, you will see a pop-up menu with widget.

2.3 Application Shortcut

Tap the icon of application you want to move, and drag to where you want to place on home screen. Tap the icon and move it to area showing a cross to delete them.

Tip:

1. Tap one icon and move on to top of another icon, you can create a new folder on home screen. Open the folder; click 'Unnamed Folder' to rename the folder.
2. Swipe down vertically from top part of a display to enter quick notification menu.

III. Network Connection

3.1 Wi-Fi Connection

Tap Settings – Wireless & Networks – Wi-Fi – tap to turn it to 'ON'. After a moment, your Wi-Fi network nearby will be listed. If you need to rescan for available networks, tap the menu  on right top corner, and tap 'Refresh'. Your device lists the networks it finds within range. Tap the network you have access to, enter password, and tap 'Connect'. When your tablet is connected to the network, the wireless indicator  appears in the status bar. Waves indicate connection strength.

Scan Device

After scanning, there will be a list of all available Bluetooth devices in range. If the device you want to pair with isn't in the list, ensure that the other device is turned on and set to be discoverable.

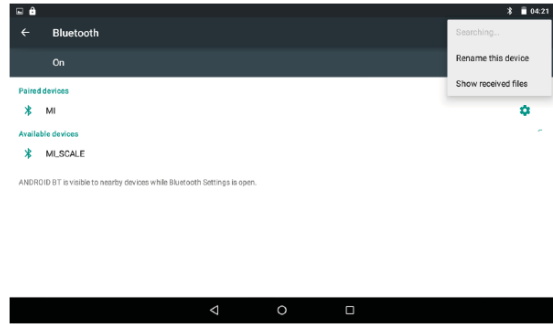

Pair with Bluetooth Device

Tap the name of an available Bluetooth device you want to pair with. On the target device you will get a 'Bluetooth pairing request' dialog. Tap 'Pair', it will then show you paired devices.

Change Your Bluetooth Name

1. Verify your Bluetooth is active.
2. Tap the menu icon on top right corner, and tap 'Rename this device'.
3. Enter a new name.
4. Tap 'Rename' to complete the rename process.

Note:

You can see the received files through "Show received files" by tapping the right corner icon. Turn Bluetooth off to save battery.

IV. Google Store

4.1 Install Apps

Find and open play store with this icon . Log into your account if you have one available; if you don't have an account, you may create a new Google account first. Search and download Apps you need.

4.2 Manage Apps

Shortcut/Icons of Apps

By tapping icon of the App you want to move in application display, you can move the shortcut to home screen.

Delete/Uninstall Apps

1. By tapping and moving the icon of an App to the cross menu, you may remove the shortcut from home screen.
2. By tapping an App in application display, you will get a prompt of 'Uninstall' with icon of  and 'App info'. Move the App to the trash bin to delete/uninstall the App. You may also go to Setting – Device – Apps – Uninstall to delete/uninstall the App.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Caches of Apps

1. You may need to clear caches of Apps when it's excess. Go to "Setting – Device – Apps"; find the App and go to App info; you can process by tapping "Clean caches".
2. By installing a third party cache cleaner, you can also clean caches.

Note:

1. Users are responsible for all charges with concerned Apps if there is any.
2. Manufacture/sellers are not reliable for Apps that are incompatible with the device.
3. In some cases, there may be no icon in the App Panel after an App is installed. Possible reasons may be that this App is not compatible with your OS or the downloaded file is a broken one so you may need to download a full version.
4. If you install and use an OS other than the one provided by the manufacturer, it may cause your device to malfunction, therefore, your device will no longer be covered by the warranty in this condition.

V. Internet Navigating

5.1 Internet Navigating

Before using your browser, make sure Wi-Fi or internet is connected.

Setting Browser

You can use the browser preinstalled, or download others you prefer. Tap the icon  on top right corner of the browser page to open the submenu for more detailed setting.

Navigating

Tap the browser icon  to open your browser. You can access a website quickly by entering the URL on screen keypad. Websites are optimized for viewing on your actual devices.

Bookmarks
