

Operational description of Remote Control Car as follow:

GK-866-899 is a toy which includes several functions, such as Forward, Backward, Left, Right, Door Control Key, Switch, Horn Voice, Shift Key, three kinds of gear about the Motor sound, enable system sounds and so on. Open the car bottom power switch, the Horn Voice will appear sound. The car has three kinds of speed, according to the speed, the car will appear different sound and turn on the different indicator light. While Forwarding or Backwarding, the car can turn right-and-left with the indicator light, and the roaring sound is allowed too. The door can be opened when the car stop. Without receiving the control signal, the Horn Voice will make a sound, at the end of the thirtieth second the car will be locked automatically, after being locked, all the functions couldn't control the car except switch. All the functions will be coded in different scale by the sending port, after receiving the control Signal, the sink decode and input the signal to the drive circuit. Complete and repeat all the functions.
