Subject: FCC Application Request

**FCC ID: S7Y-MV1**  
**FRN: 0022396238**

To Whom It May Concern,

Navtech Radar Ltd are seeking FCC approval for the equipment identified above as an original certification under Part 95M.

The equipment is used for a number of applications including wide area surveillance within airports and vehicle applications as permitted under Part 95M.

The application contains two separate reports from different test labs. The operating conditions for the equipment were identical in each test. The reason for the separate reports is purely due to the capability of the labs in terms of total frequency covered.

Yours faithfully,

Richard Poulton  
Hardware Team Leader
