Re: FCC ID: S85-DAS2400

To Whom It May Concern:

The following application is submitted on behalf of our client, Channel D Solutions, Inc., for evaluation of their model DAS2400 for certification under FCC Part 15.247.

The DAS2400 system provides wireless communications through the use of a 2402.6 – 2480.0 MHz frequency-hopping-spread-spectrum RF module, and transmits a digitally-encoded signal. It is used to expand communications coverage into areas that cannot be covered by a single antenna. The complete system is designed for and sold only to commercial end-users, and is not available to the general public.

The DAS2400 was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
