Re: FCC S8L-100306HEPA Registration Information Package for ANDREW HePA850 unit.

Dear Sir / Madam,

Attached please find documentation containing information regarding the Andrew HePA850. This information is being provided for the sole purpose of inclusion as exhibits in the Application for Certification of FCC ID referenced above. Sale of this production will be restricted to network infrastructure producers.

The packet may be filed as exhibits with the FCC; but Andrew Corporation respectfully requests that the FCC maintain in confidence, pursuant to 47-CFR §0.457 and §0.459 of the Commission rules, the information listed below:

- Schematics
- Part lists
- Operational description
- Functional block diagram.
- Photos of internal overview of the HePA850. These internal photos could reveal to a competitor certain proprietary design and manufacturing techniques, which differentiate our products from those of other vendors. Disclosure of such information would cause us to lose such competitive advantage. The internal view of this device will be restricted from the public by the equipment's placement in a locked compartment which is only accessible by authorized personnel, i.e., personnel with station license

This information is considered to be trade secret with possible patents pending, and the confidential property of Andrew Corporation.

Sincerely,

A handwritten signature in blue ink, appearing to read "Christophe Massenet", written over a horizontal line.
