

## **Whistle Confirmation of Wi-Fi Operating Channels**

To Whom It May Concern:

I would like to confirm on behalf of Whistle Labs, Inc. that the Whistle Activity Monitor (FCC ID S8W-W01A) when shipped to North America will only operate in Wi-Fi channels 1 – 11. Similarly Channels 12, 13 and 14 will be disabled. This will be accomplished by ensuring all devices manufactured for and shipped to North America contain software that explicitly configures the Atheros AR4100P (Wi-Fi chip) per it's proprietary command set to only operate on Wi-Fi channels 1 – 11.

Regards,  
David Isbister
