- Malfunctions due to human damage.

Frequently Asked Questions

Q: When adding the device in my APP, I can't find a Memobird to connect with?
 A: Try charging the printer to ensure the bluetooth is operational.

Q: My Memobird won't print, what do I do?
 A: 1 Verify if bluetooth is toggled on in your smartphone and make sure that no one else is connected to your Memobird.
 2 Check if there's no more thermal paper and change printing paper;
 3 Check if your printer is overheated; if so, please wait for it to cool before you resume printing.
 4 Restart the device. If your problem persists, press and hold the power button then plug in the power cord to enter recovery;

5 E-mail to customer service: ydkf@intretech.com

Q: Why is it printing white paper without any content?
 A: This may be caused by incorrect installation of printer paper; please try placing the paper on the reverse side.

Warning:

- Do not expose the battery to excessive heat, such as sunlight or fire;
- Do not use the product in rain or humid environments; do not remove or replace the battery;
- If you believe there is an issue with your battery, please contact after-sales service center for assistance.
- Replacing and using incorrect battery models carry the risk of explosion, please dispose of used batteries according to instructions;
-  The maximum printing temperature of the printer is 70°C, please refrain from touching;
-  Be careful when ripping the paper as the sides of sharp, please refrain from touching.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

Caution: The user is cautioned that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for uncontrolled equipment and meets the FCC RF exposure guidelines. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption ration

FCC RF Radiation Exposure Statement (Greater than 20 cm distance between users and equipment)

IC Statement

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- l'appareil ne doit pas produire de brouillage, et
- l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This equipment complies with Canada radiation exposure limits set forth for uncontrolled environments. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
