|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|----------------------------------|-----------------|---|
| Does a system built with the EUT that implement the provisions of 47CFR 15.323(c)(5) enabling the use of the upper threshold for deferral?                                                            | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| According to 47CFR15.323(c)(5).4, does your model <b>not</b> use bandwidth in further cooperation with other devices at any range?                                                                    | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| Does a system built using the EUT that operate under the provisions of 47CFR 15.323(c)(6) incorporating provisions for waiting for a channel to go clear?                                             | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No       |                                  |                 |   |
| According to 47CFR15.323(c)(8), does EUT use the same antennas for transmission and reception as for monitoring?                                                                                      | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| Does a system built with the EUT that operate under the provisions of 47CFR 15.323(c)(10) to test for deferral only in conjunction with a companion device?                                           | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No       |                                  |                 |   |
| Does a system built using the EUT that operate under the provisions of 47CFR 15.323(c)(11) enabling the access criteria check on the receive channel while in the presence of collocated interferers? | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No       |                                  |                 |   |
| According to 47CFR15.323(c)(12), does EUT <b>not</b> work in a mode with denies fair access to spectrum for other devices.                                                                            | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| Does your model have the monitoring made through the radio receiver used for communication?                                                                                                           | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| Does your model transmit control and signaling channels?                                                                                                                                              | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| According to 47CFR15.307(b), does the applicant have the affidavit from UTAM Inc.?                                                                                                                    | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| According to 47CFR15.319(b), do all transmissions use only digital modulation techniques?                                                                                                             | <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No       |                                  |                 |   |
| The provisions within the EUT for self-check, by which compliance with 47CFR15.319(f) is obtained.                                                                                                    | A - Connection break down, cease of transmit                              | Situation                        | Reaction of EUT |   |
|                                                                                                                                                                                                       | B - Connection break down, EUT transmits signaling information            | Switch-off compare device        | B               | A |
|                                                                                                                                                                                                       | C - Connection break down, compare device transmits signaling information | Hook-on by compare device        | B               | N |
