Because the majority of the handset housing is composed of display, speaker, operating controls, and a removable battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. The label to the battery pack is not acceptable because the battery pack is a removable item. For this reason, we propose placing the label carrying the FCC identifier inside the battery compartment as shown in the figure.

The batteries are designed for easy removal and the label will be visible whenever the batteries are removed for charging or replacement. The FCC identifier or label will be readily viewable per FCC Rule 2.925 (d).

The label will be readily visible at the time of purchase because the device will be marketed without the battery installed. The FCC identifier or label will be readily viewable at the time of the purchase to comply with Part 2.925 (d).

Sincerely,
