

## Attestation

FCC Laboratory

Date: September 30, 2024

To Whom It My Concern,

Ruckus Wireless LLC, attest that our Product bearing FCC ID: S9GR760 complies with device protocol requirements and operation restrictions for 6SD.

### Device Protocol Attestation Statement:

- a. This device will contact an AFC system at least once per day to obtain the latest list of available frequencies and the maximum permissible power the standard power device may operate with on each frequency at the standard power device's location. If the device fails to successfully contact the AFC system during any given day, the standard device may continue to operate until 11:59 p.m. of the following day at which time it will cease operations until it re-establishes contact with the AFC system and re-verifies its list of available frequencies and associated power levels - 15.407(k)(8)(iv)
- b. This device will automatically acquire geolocation and re-register with AFC to obtain frequency and power values after a power cycle.
- c. This device if using an external geolocation source will be connected to a Proxy device using a secure connection that ensures only an external geolocation source approved for use with a standard power device provides geographic coordinates to that standard power device.

We acknowledge that the above referenced device is prohibited for control of or communications with unmanned aircraft systems, including drones.

If there any questions, please do not hesitate to contact us.

Sincerely,

Principal Wireless Compliance Engineering

Ruckus Wireless Inc.
