Sunnyvale, CA 94085**

1.0 Introduction

The Ruckus Wireless VX2110 is an 802.11b/g wireless module operating in the 2.4 GHz band. It is designed to operate as a slave device to a USB host processor, and is compatible with the USB 1.1 and 2.0 specifications.

2.0 User Information

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment (per FCC Part 15.21).

3.0 RF Exposure

As a mobile and fixed RF device, this device must have at least 20cm separation from the user.

4.0 Operation

Plug the mini-B plug into the VX2110. Then plug the other end of the USB cable into the host. The LED on the VX2110 will light indicating that the driver is loaded and the device has power. The remaining steps in setting up the mode of operation will depend on the type of host operating system used and the application software.
