

Ruckus Product Family VX2XX1 Operational Theory

Note that the Product Family VX2XX1 contains six product models:

1. VF2811
2. VF2821
3. VC2711
4. VC2721
5. VF2111
6. VF2121

The VF2811 is a Wireless Access Point with 16 MByte of SDRAM, The VF2821 is a Wireless Access Point with 32 Mbyte of SDRAM. Both of these products are designed to process Video Traffic.

The VC2711 is a Wireless Access Point with 16 MByte of SDRAM, The VC2721 is a Wireless Access Point with 32 Mbyte of SDRAM. Both of these products are designed to process Voice Traffic.

The VF2111 is a Wireless Adapter with 16 MByte of SDRAM, The VF2121 is a Wireless Adapter with 32 Mbyte of SDRAM. Both of these products are designed to process Voice Traffic and Video Traffic.

The below diagram provides the Operational Theory of the products.

Ruckus VX2XX1 (Models VF2811, VF2821, VC2711, VC2721, VF2111, VF2121) Transmit and Receive
