## Cover Letter

Subject: Cover Letter - S9GZF7761CM Class Two Permissive Change

Dear Sir/Madam,

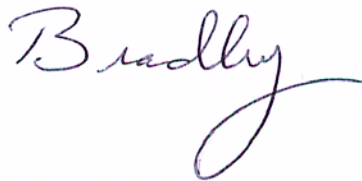

The test report for the Ruckus Wireless, Inc. model ZF7761-CM, FCC ID: S9GZF7761CM is greater than one year old. This report provides a demonstration of compliance of the current product to current applicable standards.

The product has not changed since original testing. The ZF7761-CM utilizes the exact same radio PCB, radio chipsets, Access Point PCB, software, and antenna's as existing DFS approved Ruckus products [FCC ID: S9G-ZF7762X; Models: ZF7762, ZF7762-S, ZF7762-T, ZF7762-AC, ZF7762-S]. The reason this product cannot use the same FCC ID is because of significant enclosure changes to include a cable modem in the enclosure. Also, this product was originally approved under a separate FCC ID as the other models. This product demonstrates the same level of compliance to FCC Part 15.407 standards as Ruckus FCC ID: S9G-ZF7762X.

Sincerely,

Clinton Bradley  
Compliance Engineer
